

# NUDURA Project Profile

Farmington Library - Farmington, Illinois

## FAST FACTS

- ICF was a great fit for this project, as it offered a continuous, highly efficient thermal envelope, and also offered the benefit of a rigid structure and great sound absorption, to keep exterior sound outside of the library
- The most unique areas were the rake walls and the clock tower soaring to 25' above the finished floor
- Along with that two massive 2'x2'x20' high pilasters designed into the west wall for added wind resistive capabilities

## PROJECT STATISTICS

**Location:**

Farmington, Illinois

**Type:**

Commercial Library

**Size:**

9,033 gross sq ft.

**ICF Use:**

8,064 sq ft.

**Cost:**

\$2,042,204

**Total Construction:**

395 Days

**ICF Installation Time:**

38 Days

## CONSTRUCTION TEAM

**Owner:**

Shane Howard

**General Contractor:**

Bill Bishop

**Form Distributor:**

Chad Johnson

**ICF Installer:**

Bill Bishop

**Architect:**

Mark Misselhorn

**ICF System:**

NUDURA Inc.
