

NUDURA Project Profile

The Waverly - Langford, British Columbia

FAST FACTS

- 100% of the exterior walls for living space is ICF construction which allows for greater energy efficiency for the people living there
- This type of Construction is also far superior with regards to sound ratings when compared to wood frame buildings which is huge consideration when people are living in a multi-story building
- The mass walls leave very little opportunity for moisture to penetrate and if it does, will do relatively little damage when compared to a wood frame

PROJECT STATISTICS

Location:

Langford, British Columbia

Type:

Commercial Multi-Story

Size:

35,500 sq ft.

ICF Use:

35,500 sq ft.

Cost:

\$7,500,000

Total Construction:

14 Months

ICF Installation Time:

5 Months

CONSTRUCTION TEAM

Owner:

Malcolm Hall

General Contractor:

Malcolm Hall

Form Distributor:

Rob Voros

ICF Installer:

Malcolm Hall

Architect:

Bob Rocheleau

ICF System:

NUDURA Corp.
