

You're Invited: School Success Series High-Performance Construction for K-12 Schools

Join us for one of our upcoming events focused on the unique needs of K-12 school administrators, district officials and architects specializing in educational facilities. Gain the knowledge, tools and connections needed to create and maintain top-tier school environments that are safe, sustainable and inspiring.

These are just a few event highlights:

Witness success stories of schools that have achieved net-zero energy usage, disaster resilience, sustainability targets, and easy, cost-effective maintenance goals

Learn from industry experts about innovation in carbon reduction, building methods, materials and strategies that enable schools to achieve net-zero

Discover how A/E teams overcame challenges during their school construction projects

Experience a local school construction site and get hands-on training

Network with industry leaders, including architects, engineers, consultants, as well as school officials who have been involved with ICF schools around the country.
